Singapore & Nottingham Breast Pathology Online Masterclass

Addressing Challenges in Breast Fibroepithelial Lesions

The Singapore & Nottingham Breast Pathology Online Masterclass aims to improve the diagnostic accuracy and concordance of breast fibroepithelial lesions (FEL).

Concordance in these lesions is often low. The masterclass covers controversial areas in detail, following the patient journey from diagnosis to surgery and treatment, providing an update on molecular pathology, imaging findings, surgical and oncological management. Specific cases will be discussed comprehensively in the slide seminar session, with opportunities for questions.

Who is it for?

With a faculty of leading experts, the masterclass is ideal for practising pathologists, pathology fellows and trainees, as well as surgeons, oncologists and those involved in the diagnosis and management of breast FEL.

It takes place online, so you can learn from our experts from your own home or office.

Scientific Programme

- Pathology of FEL of the breast
- Current diagnostic concordance of FEL; the UK experience
- Pitfalls and challenges in the classification of FEL
- Imaging findings of FEL
- Molecular pathology of FEL
- Surgical management of FEL
- Oncological management of FEL
- Slide seminar case discussion

Faculty

- Dr Jason Chan (Singapore)
- Professor Ian Ellis (Nottingham, UK)
- Professor Stephen Fox (Melbourne, Australia)
- Professor Elena Provenzano (Cambridge, UK)
- Professor Cecily Quinn (Dublin, Ireland)
- Dr Eugene Ong (Singapore)
- Professor Emad Rakha (Nottingham, UK)
- Dr Laura Rosenberger (Duke Durham, USA)
- Professor Stuart Schnitt (Harvard Boston, USA)
- Professor Abeer Shaaban (Birmingham, UK)
- Professor Puay Hoon Tan (Singapore)
- Dr Yah Yuen Tan (Singapore)
- Professor Gary Tse (Hong Kong)
- Dr Fuh Yong Wong (Singapore)

Moderator:

- Nehal Atallah

CPD

The masterclass is approved by the Royal College of Pathologists (6 CPD points) and the Singapore Medical Council (4 CME points).
